

# Croatan National Forest

| Variable                                   | Live    | Dead    |
|--|---------|---------|
| Median Inundation Frequency (%)            | 0.13    | 0.19    |
| Median Distance to Estuary (m)             | 4498.2  | 4540.32 |
| Median Distance to Artificial Drainage (m) | 2214.52 | 2022.5  |
| Median Elevation (m)                       | 9.84    | 9.43    |

| Land Cover Class               | Pixel Count (Dead) | Dead Tree Area (m^2) | Total Dead Trees | Live Tree Area (m^2) | % Experiencing Mortality |
|--------------------------------|--------------------|----------------------|------------------|----------------------|--------------------------|
| Deciduous Forest               | 110                | 99000                | 210              | 549000               | 15.28                    |
| Scrub/Shrub                    | 593                | 533700               | 981              | 7419600              | 6.71                     |
| Palustrine Forested Wetland    | 99376              | 89438400             | 193981           | 310604400            | 22.36                    |
| Palustrine Scrub/Shrub Wetland | 7140               | 6426000              | 18890            | 22654800             | 22.1                     |
| Estuarine Scrub/Shrub Wetland  | 67                 | 60300                | 193              | 67500                | 47.18                    |
